KV-S1037X PERSONAL WORKGROUP SCANNERS

Space-saving design.
Versatile document handling.

KV-S1037 Series Personal Workgroup Scanner

In every working environment, space is at a premium so it's vital that your technology helps – rather than hinders – the way your business works, delivering the performance and space-saving design you demand.

The KV-S1037X personal workgroup scanner provides industry-leading performance, with versatile document handling capabilities and a compact footprint.

High-performance scanning in a compact body

- The KV-S1037X – can achieve scanning speeds of up to 30ppm/60ipm @300dpi in color
- Compact footprint means the scanner fits easily into the smallest of spaces such as a reception desk or small office cubicle

Versatile document handling

- The KV-S1037X offers passport scanning, as well as scanning of embossed hard cards and long documents, such as EKGs
- It can also handle documents weighing between 5.4 - 91 lbs.

Wired and wireless connectivity

- The KV-S1037X includes 802.11 b/g/n wireless network connectivity
- The KV-S1037X also offers a built-in Gigabit Ethernet allowing you to connect directly to your office network

High-speed / high capacity output

Alongside impressively compact dimensions, the KV-S1037X scanner delivers performance to match anything in its class.

Alongside an auto-document feeder (ADF) capacity of 50 sheets, the model scans at up to 30ppm/60ipm @300dpi in color, giving you the same speeds for both binary and color documents.

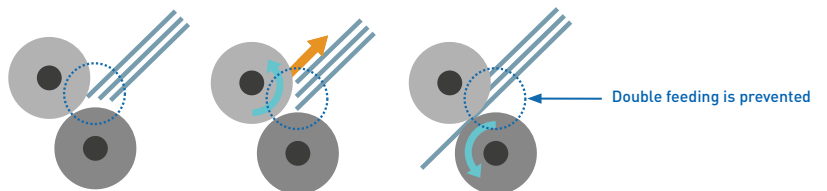

Unmatched document versatility

When it comes to document and media handling capabilities, the KV-S1037X scanner is more than a match for the competition. It can scan paper and hard cards weighing between 5.4 - 91 lbs. and can scan passports as well as long-paper at unlimited lengths. This scanner can handle documents ranging from invoices to medical scripts and ID cards.

Real-world reliability

The KV-S1037X scanner is designed to meet the rigorous demands of any office user. It has a daily duty of up to 3,000 pages and a rated roller replacement cycle of 100,000 pages.

The Active Double Feed Prevention Roller System ensures fewer scanning delays and smoother scanning operation.

Easy document management

With Panasonic's Image Capture Plus technology, you can transfer scanned image data to your PC. Then you can edit, switch or delete pages via an intuitive user interface, which you can then output to a variety of text-editable document formats.

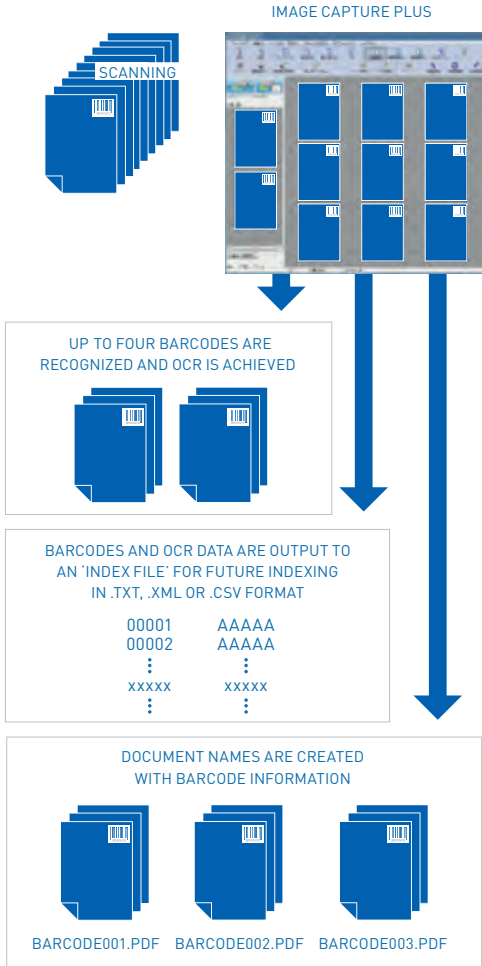

Simplified scan settings

The built-in auto preview function allows you to adjust image settings during the scanning process. Panasonic Auto Preview will provide nine different images of your scanned document so you can select the best image settings. So there's no need to waste time going through a trial-and-error process to achieve the best scanned images possible.

In addition, the auto re-scan feature allows you to adjust the image settings on an already scanned document, eliminating the need to re-scan the entire document again.

Saving vital space

They say the best things come in the smallest packages. That is certainly the case with the KV-S1037X scanner. It features a compact body that can fit into confined, narrow spaces without compromising on performance.

COMPARE THE PERFORMANCE of **PANASONIC SCANNERS** ENGINEERED FOR THE REAL WORLD

TECHNICAL SPECIFICATIONS		PHYSICAL SPECIFICATIONS	
Image Sensor Type	Contact Image Sensor at 600 dpi Automatic black and white background reference	Power Requirements	AC 100 - 125 V, 50/60 Hz AC 200 - 240 V 50/60 Hz
Light Source	RGB LED	Power Consumption	Maximum (scanning): 17W or less Minimum (ready): 4.5W or less Sleep Mode: 1.6 W or less Power Off: 0.3 W or less
